

Best Price Suggestor

SAI KRISHNA VADUGURI

OBJECTIVES

1

To Help College Students.

2

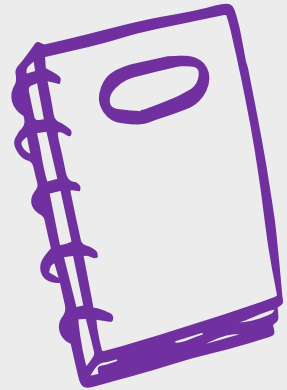

Platform where any college student can sell.

3

Every Buyer have Freedom to say their own price.

4

Suggesting a Good Price Seller.

Introduction

- ❑ We got this idea by observing the students of our college Vellore institute of Technology.
- ❑ Students who are finishing their degree, under graduation and post graduation want to sell their items like cycles they used, beds they used ,headphones they used and many other things they used.
- ❑ There are students who want to sell their item or exchange their item with cash because the need for money.
- ❑ And there is no platform like website or Mobile Application for the students in the college to sell their items or exchange their items that want to sell with the cash.

Introduction

- ❑ So we decided to build one private platform for college. Here private platform it is private to only for that college. To understand better only college students of Vellore institute of technology can sell or buy products. Outsiders are not allowed.
- ❑ Our platform not only allow to sell or buy the items but also suggests the best price to seller .And Every client can say their own price ,here price should be must above the minimum price set by seller.

Client Requirements

Students of college who are pursuing their degrees, Under graduation and Post graduation.

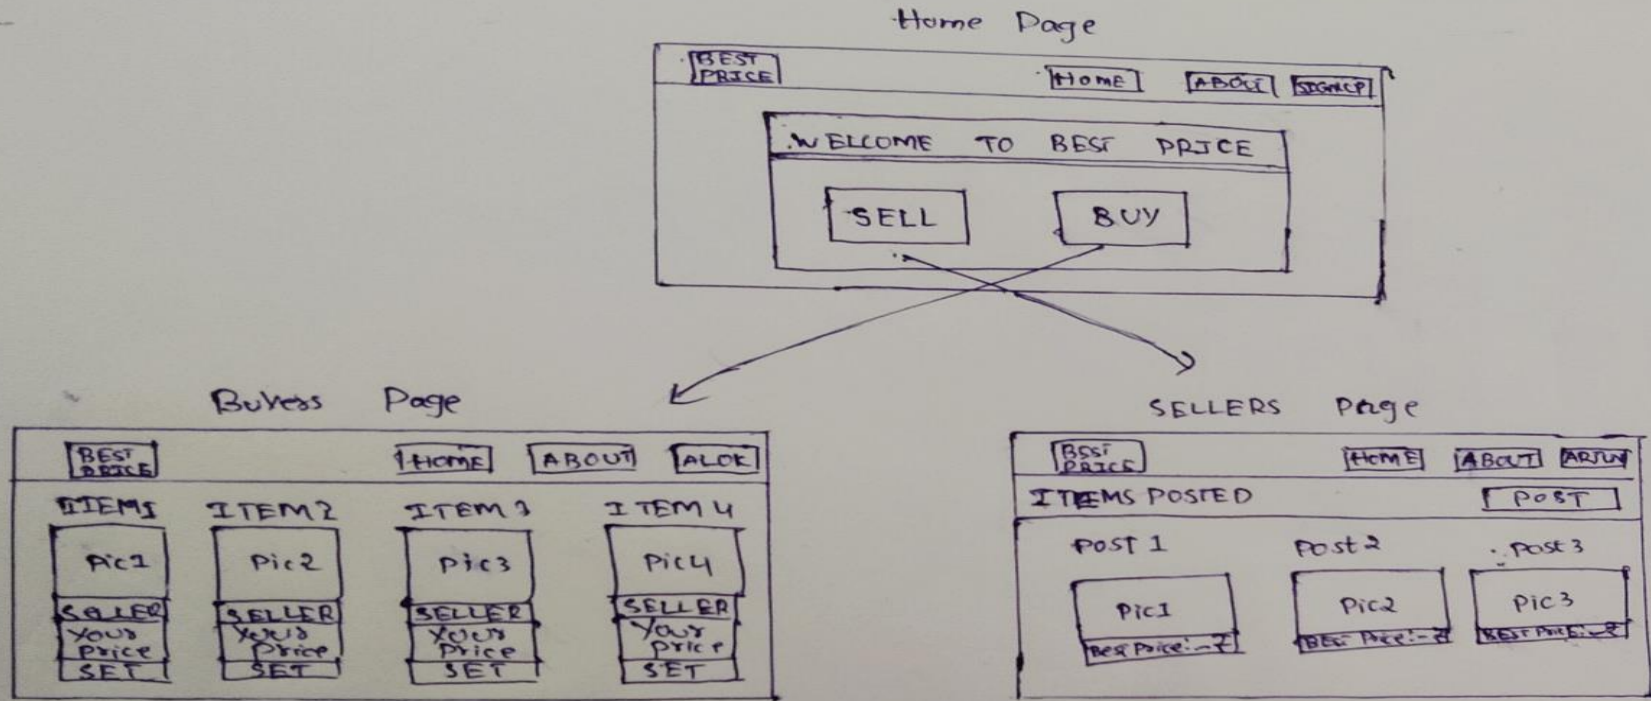

Clients are the students who want to sell their items, not the students who want to buy their items. Because right now our platform is just for sellers and suggesting or giving good price to them.

Buyers are not our clients, because buyers will be the clients for sellers who sell his items to others who are willing to buy.

MY BACKEND DATABASE

Setprices table

The screenshot shows the phpMyAdmin interface. On the left is a sidebar with a tree view of databases and tables. The main area displays the 'setprices' table structure and data. A yellow banner at the top of the main area indicates that 15 rows are shown (0-14) and the query took 0.0003 seconds. Below this, the SQL query 'SELECT * FROM `setprices`' is shown. A toolbar contains various actions like Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations, and More. Below the toolbar, there are controls for showing all rows, number of rows (25), filter rows (Search this table), and sort by key (None). An 'Extra options' button is also present. The table data is displayed in a grid with columns: id, name, item, price, and date. Each row has checkboxes for Edit, Copy, and Delete actions.

REFERENCE

OUR AIM IS TO SUGGEST BESTPRICE TO SELLER

- ☐ I have not taken any reference from any things
- ☐ This is purely implemented on my idea, which i got the idea from observing students of vit vellore

Thank you!
